A WARNING.

If you want to keep the painter at work don't use Masury's Paints, for if you do you will surely rob yourself of the pleasure of having him repaint for several years. It is especially prepared to stand the severity of the sea coast. Its durability is unexcelled.

HE HAD 'EM AGOG.

For some months past various people at Ormond have been receiving anonymous letters of a defamatory nature.

They had been received by so many that the citizens of the little town were agog over the matter. One of the letters was sent to Miss Russell, a highly respected young lady. Suspicion pointed to Frederick C. Remo, an ex-employee of the railroad company, as the author of the letters, and the three brothers of the young lady are alleged to have taken the matter in hand and given Remo a hearty strapping Friday evening of last week. It is now rumored that Remo accuses the three brothers of robbing him of forty-five dollars at the time they gave him the thrashing, but the consensus of opinion among the residents of Ormond seems to be that it is but a ruse of Remo's to get the Russell boys into trouble.

Remo is at present out of the State, and it is not known whether or not he will swear out a warrant for the arrest of the Russells.

Not only will nearly every county in Florida be represented at the Fair, but exhibits have been entered from twelve other States and two foreign countries, both of the latter coming direct to our Fair.

One of the most interesting exhibits will be a complete whip-making factory in operation, showing the process braiding common buggy whips. This exhibit comes from the largest whip factory in the world, at Westfield, Mass.

The merchants of this city are live and progressive, and this season they have filled their stores with the finest and best goods. There is no excuse for anyone to send away from home to buy their goods, for they can get what they wish at home. The person who is continually sending to the larger cities is of precious little benefit to the community which he lives.
